III B. Tech II Semester Supplementary Examinations, November - 2019 ENERGY AUDIT, CONSERVATION AND MANAGEMENT

(Electrical and Electronics Engineering)

	Time	: 3 hours Max. M	1arks: 70
		Note: 1. Question Paper consists of two parts (Part-A and Part-B) 2. Answer ALL the question in Part-A 3. Answer any FOUR Questions from Part-B	
1	a)	PART –A Explain the role of an Energy manager. (14 M	
1.	b)	Explain about different measurement techniques used for measuring luminous intensity.	[2M] [2M]
	c)	Explain the effect of harmonics on Power factor.	[2M]
	d)	Explain how an HVAC system improves the energy efficiency.	[3M]
	e)	Give the significance of Power factor correction.	[3M]
	f)	Explain the term Return on investment.	[2M]
	$\underline{PART - B} \tag{56}$		Marks)
2.	a)	Explain various energy conservation schemes in detail.	[7M]
	b)	Explain in detail about Sankey diagram, Pie charts and Load Profiles used in Energy flow representation.	[7M]
3.	a)	Explain in detail about Energy conservation in lighting.	[7M]
	b)	If a lamp of 200 C.P. is placed 1 meter below a plane mirror which reflects 90% of light falling on it, determine illumination at a point 3 meter away from the foot of the lamp which is hung 4 meters above ground.	[7M]
1	a)	Explain the effect of non-linear loads on the Power factor	[7M]
4.	a) b)	Explain the effect of non-linear loads on the Power factor. A synchronous motor having a power consumption of 60 kW is connected in parallel with a load of 200 kW having a lagging power factor of 0.86. If the combined load has a power factor of 0.95, what is the value of leading reactive kVA supplied by the motor and at what power factor is it working?	[7M] [7M]
5.	a) b)	List the different types of Air conditioners and explain any one type of it in detail. Explain energy conservation in commercial buildings.	[7M] [7M]
6.	a)	What is the time value of money and explain its importance?	[7M]
	b)	Explain computation of simple pay back method with suitable example.	[7M]
7.	a)	Explain the conditions to be fulfilled for an energy project to economically justifiable.	[7M]
	b)	Explain the net Present value method of computation of Economic aspects.	[7M]
